INOVANCE

ISMG Series

General-Purpose High-Power Servo Motor

Features & functions

- IP54 overall protection and IP67 encoder protection
- Standard 23-bit multi-turn absolute encoder
- Vibration resistance up to 5G
- IE4 energy efficiency equal
- Mainstream configurations supporting over 250% maximum output torque
- Two inertia types available

About Inovance

The Inovance Group, founded in 2003, is a rising star in the global industrial automation business and has revenues of \$4.2 in 2023. Inovance is headquartered in Shenzhen, China, and has built a global operation with offices and facilities in Germany, France, Italy, Spain, Turkey, India, and South Korea. Additionally, the company has a strong network of distribution partners around the world.

The company's flexible production techniques and expert understanding of all industry sectors - from plastics to printing to packaging to iron & steel production - have allowed it to establish globally leading industry-specific business units. Over the years, Inovance has built an engineering team with specialist expertise in industrial automation. This knowledge allows it to form strong partnerships with OEMs and end users, providing ongoing advice about how to get the most out of their automation solutions today, and how to stay prepared for the market and technology changes that are coming in future.

Forward, Always Progressing

Global Factories

Inovance has built digital factories around the world, including one in India that has been in operation for a decade. In 2022,we started to build the Hungary factory for localized manufacturing in Europe.

Worldwide R&D network

Inovance invests heavily in R&D, enabling the company to continuously release a steady stream of new and innovative products. To ensure that all products meet all key global standards wherever possible, Inovance's R&D teams in Europe, India, and China, all work together seamlessly and virtually on engineering projects. Inovance calls this co-development, and the practice ensures that the best technology knowledge and solutions can be gathered from all around the business; and that they are always implemented and adapted in a way that meets the needs of local markets. The company's commitment to innovation is demonstrated through its headcount: over 20% of Inovance's entire global workforce is in R&D.

Solutions for the Injection Molding Industry

System topology

Solution benefits

- Applicable to standard horizontal all-electric injection molding machines, oil-electric hybrid injection molding machines, vertical injection molding machines, electric secondary carriages, dual-color injection molding machines, and other electric injection molding equipment
- Covers mold closing force of 10 tons to 1000 tons and injection speed of 0 mm/s to 800 mm/s
- Supports secondary development as a complete process program; covers most injection molding applications when used with the standard software directly
- All-in-one Inovance solutions including a cloud platform, control system, servo drives, servo motors, heavy-duty ball screws, electrical accessories, and core components

Solutions for the Printing Industry

System topology

Solution benefits

- 350 m/min; overprint accuracy: ± 0.05 mm
- Vision/Double electric eye color registration module (standard), allowing automatic pre-registration at start
- Direct-drive motor (optional), eliminating the need for reducers; 23-bit absolute encoder, ensuring transmission accuracy
- Servo-integrated analog probe function, allowing direct connection of photoelectric sensors without color registration boxes and ensuring reliable latching in microseconds
- Vision static image and color registration systems (optional), allowing intelligent monitoring of horizontal and vertical deviations, printing pressure, and color deviation
- IoT functions, facilitating remote maintenance, online commissioning, and production capacity statistics

Ordering code

ISM G1 - 30D 15C D - A3 3 1 F A - INT

① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪

① ISM series servo motor	④ Rated speed (rpm) Consists of two digits and one letter B: x 10 C: x 100 For example, 15C means 1500 rpm.	⑦ Shaft connection method 3: Keyed solid shaft with tapped holes; rotor with exterior magnet A: Keyed solid shaft with tapped holes; rotor with interior magnet
② Flange size 1: 200 x 200 2: 266 x 266		⑧ Brake, reducer, and oil seal 1: w/ oil seal, w/o brake 4: w/ oil seal, w/ brake Note: The ISMG1 models support the brake option.
③ Rated power in S4 duty (W) Consists of two digits and one letter C: x 100 D: x 1000 E: x 10000 For example, 30D means 3000 W.	⑤ Voltage class (V) D: 380 V	⑨ Customized feature F: Forced air cooling
	⑥ Encoder type Consists of one letter and one digit A3: 23-bit multi-turn absolute encoder	⑩ Product version A: Second generation
		⑪ Version: INT: International

Note: [1] The motor model naming rules adopt the S4 duty cycle.

Components of the ISMG series motors

ISMG1/G2 standard models

No.	Name	No.	Name
①	Junction box (with wiring instruction labels)	⑥	Air filter
②	Power cable input end	⑦	Mounting flange
③	Aviation plug for encoder	⑧	Flange mounting spigot
④	Hoisting lug	⑨	Output shaft
⑤	Independent cooling fan	⑩	Foot

ISMG1 models with brake

No.	Name	No.	Name
①	Junction box (with wiring instruction labels)	⑥	Independent cooling fan
②	Power cable input end	⑦	Air filter
③	Aviation plug for encoder	⑧	Flange mounting spigot
④	Aviation plug (2-pin) for fan	⑨	Output shaft
⑤	Aviation plug (4-pin) for brake	⑩	Foot

Mechanical specifications

Item	Description
Duty	Continuous S1
Insulation resistance	Over 50 MΩ at 500V DC
Ambient temperature	-20°C to +50°C (non-freezing)
Ambient humidity	20% to 90% RH (non-condensing)
Storage temperature	-20°C to +60°C (non-freezing)
Storage humidity	20% to 90% RH (non-condensing)
Installation mode	IM B35
Insulation class	155(F)
Insulation voltage	180V AC for 1 minute (for the 380 V class)
Housing IP rating	IP54
Cooling method	IC416 (independent fan ventilated)
Impact	Below 200 m/s ²
Maximum radial vibration	Below 200 m/s ²
Maximum axial vibration	Below 45 m/s ²
Fan type	Capacitor-operated single-phase centrifugal fan
Fan power	ISMG1: 41 W; ISMG2: 134 W
Fan voltage	220V AC/230V AC
Fan frequency	50 Hz/60 Hz
Built-in PTC limit ^[1]	130°C
KTY resistance at 10°C to 30°C ^[1]	514 Ω to 653 Ω
Certification	CE/EAC/UKCA
Number of motor poles (2p)	8
Winding typology	Y
Excitation mode	Permanent magnetic
Rotation direction	The motor rotates counterclockwise (CCW) as observed from the load side under the forward rotation command.

Note: [1] For models without brake, the PTC and KTY drain wires are built into the encoder aviation plug. For models with brake, the PTC and KTY lead wires are connected in the junction box.

ISMG1-22D15CD-**34*A-INT								
ISMG1-23D20CD-**34*A-INT								
ISMG1-28D20CD-**34*A-INT								
ISMG1-30D15CD-**34*A-INT								
ISMG1-41D20CD-**34*A-INT								

Note: [1] The 24 VDC power supply shall be prepared by the user.
[2] The holding brake must not be used for braking.
[3] The time required to release brake and the time required to brake may vary with discharge circuits. Be sure to confirm the actual action delay of the product.
[4] When determining the length of the motor brake cable, take the voltage drop caused by cable resistance into account. The input voltage for the brake must be at least 21.6 V.
[5] Use a cable with a diameter greater than 0.5 mm² to connect the DC power supply to the motor brake. The brake must not share power supply with other appliances to prevent voltage or current fall due to the simultaneous operation of other appliances, which may lead to misoperation of the brake.

Allowable Axial and Radial Loads

Model	Motor Model	Shaft Extension Length (mm)	Allowable Radial Load (N)	Allowable Axial Load (N)

Aviation Plug Pin Assignment for ISMG Motors with A3-23 Bit Encoder

Encoder Aviation Plug on Motor	Pin Assignment			Encoder Plug on Drive	Pin Assignment	
	Pin No.	Signal	Color		Pin No.	Signal
17-Pin aviation plug (male) Direction of view 	A	PS+	Yellow	DB9P plug (male) Direction of view  Recommendations Cable plug shell: SZTDK DB9P, black case Core: SZTDK DB9P, bonding wire, male, blue plastic	1	PS+
	B	PS–	Yellow/black		2	PS–
	E	VB battery+	Blue		-	-
	F	VB battery–	Blue/Black		-	-
	G	+5 V	Red		7	+5 V
	H	GND	Orange		8	GND
	J	Shield	Metallic silver		Housing	Shield
	K	PTC+	Blue		5	PTC+
	L	PTC–	Blue		6	PTC–
		KTY+	White			KTY+
	M	KTY–	Green		5	KTY–

Note: The pin assignment of DB9P plugs may vary slightly depending on drive models. For details, see relevant drive guides.

Cable Selection for ISMG Motors with A3-23 Bit Encoder

Cable	Cable Model for External PTC	Cable Model for External KTY	Cable Length (L)	Cable Diagram
Encoder cable connecting ISMG motor to IS810 servo drive	S6-L-P021-3.0-PTC	S6-L-P021-3.0-KTY	3000 mm	
	S6-L-P021-5.0-PTC	S6-L-P021-5.0-KTY	5000 mm	
	S6-L-P021-10.0-PTC	S6-L-P021-10.0-KTY	10000 mm	

Note: [1] This cable is suitable for ISMG motors and IS810 servo drives. For details, see relevant drive user guides.

[2] This cable is suitable for ISMG motors with or without brakes.

[3] The cable for PTC is suitable for connecting the PTC thermistor signal of the motor stator winding to the drive, while the cable for KTY is suitable for connecting the KTY thermistor signal of the motor stator winding to the drive.

[4] When the cable is connected to a model without a brake, leave the two PTC drain wires at the DB9 terminal on the drive unconnected and wrap them.

[5] When the cable is connected to a model with a brake, connect the two PTC or KTY drain wires at the DB9 terminal on the drive to one end of a pre-prepared two-core wire harness. The other end of the wire harness should be connected to the PTC or KTY terminal in the junction box of the motor.

Aviation Plug Pin Assignment for ISMG Motors with R1 Resolver

Encoder Aviation Plug on Motor	Pin Assignment			Encoder Plug on Drive	Pin Assignment	
	Pin No.	Signal	Color		Pin No.	Signal
17-Pin aviation plug (male) Direction of view 	A	REF+	Red/White	DB9P plug (male) Direction of view  Recommendations Cable plug shell: SZTDK DB9P, black case Core: SZTDK DB9P, bonding wire, male, blue plastic	1	REF+

Note: The pin assignment of DB9P plugs may vary slightly depending on drive models. For details, see relevant drive guides.

Connector Kit Selection

Connector Kit	Model	Diagram
ISMG-DB9 terminal 20-29 aviation plug	S6-C5	

Note: [1] DSUB connectors are suitable for IS810 P-type drives. N-type drives do not require this connector. For details, see relevant drive user guides.

Wiring

Wiring for standard models

Wiring of the terminal block in the junction box

Note: [1] Please refer to the wiring guide label on the inner side of the junction box lid.

[2] Connecting the fan to a 380 VAC power supply will damage the fan.

[3] The PTC and KTY drain wires of models without brake are built in the encoder aviation plug.

Wiring for models with brake

Wiring of the terminal block in the junction box

Note: [1] Please refer to the wiring guide label on the inner side of the junction box lid.

[2] For the wiring between the PTC or KTY thermal protection resistor and the servo drive, see pin assignment specified in the relevant servo drive guide.

Brake wiring

Picture	No.	Description
	1	The aviation plug is near the output shaft end of the motor.
	2	2-pin connector
	3	Connect to a 24 VDC power supply; connecting to a 220 V power will damage the brake.
	4	Use a cable with a diameter greater than 0.5 mm² to connect the DC power supply to the motor brake.

Fan wiring

Picture	No.	Description
	1	The fan aviation plug is near the fan end of the motor.
	2	Connect to pins B and D.
	3	Connect to single-phase 220 VAC power supply.
